NFRDI/Philippines, 2018. Establishment and Operation of a Regional System of Fisheries Refugia in the South China Sea and Gulf of Thailand, Report of Fisheries Data Collection on Fish Landing Sites in Palawan, Zambales and Pangasinan of Philippines during October-December 2018. Southeast Asian Fisheries Development Center, Training Department, Samut Prakan, Thailand; FR/REP/PH29, 19 p.

HIGHLIGHT ACTIVITIES

- 1) For the 4th Quarter of 2018, fisheries data collected includes gathering and collection of production data by boat by landing center; Identification of fish species caught by gear type; gathering and collection of catch per unit effort by gear by landing center; length and weight data by species by gear in total of 7 fish landing sites for the 3 sites
- 2) A total of 148 fishing vessels landed their catch during October to December of 2018 in Coron, Palawan with a total catch of 90.17 metric tons. 224 species of fish were observed during the 4th quarter. In Masinloc, Zambales, a total of 49 fishing vessels landed their catch during the months October to December of 2018 with a total catch of 82.38 metric tons, while in Bolinao sampling sites, 20 boats landed were sampled with a total catch of 16 metric tons for the 3rd quarter.
- 3) It was observed that fifteen different fishing gears were used fishing in Coron in the fourth quarter. Bagnet dominated the catch with the highest catch of around 35.51 metric tons for the 4th quarter. 4 types of fishing gears were observed in Masinloc, Zambales and 4 fishing gears in Bolinao. The Table 1 shows the landing center, fishing gear used, month of fishing and number of boats unloaded per fishing gear as well as the total unloaded catch per gear type and landing center. The data was shown in Table 2 and 3 is for Masinloc, Zambales and Bolinao, Pangasinan, respectively.

Table 1. Summary of Fisheries Data Collected in Coron, Palawan. (October to December 2018)
