Cruise report on Research Activities

1. Cruise Summary

Vessel name: M.V. SEAFDEC 2
Cruise no.: 7-1/2005 **Leg no.:** -
Project Title: Marine Resources Survey in the Gulf of Thailand
Duration: 1-13 February 2005 (13 days)
Covered water: The Gulf of Thailand
Latitude 07°07'.50 N-11°37'.50 N
Longitude 100°22'.50 E-102°22'.50 E
Port of call: Samui Island; Suratthani province and Songkhla province, Thailand
Objective: Verify research methodology in water of relevant countries (Thailand) and National survey for Thailand.
1. To conduct demersal fish sampling by Bottom trawl
2. Oceanographic survey by using Intregated Conductivity Temperature and Depth System (ICTD), ThermoSalinograph-Fluorometer Sytsem (TSG) and Profiling Reflectant Radiometer system (PRR)
3. Biological Data collection; Plankton and Marine larvae collection by Bongo net
4. Hydro-acoustic bottom survey by Scientific Echo Sounder (Furuno FQ-80)

2. List of personal on board

Ship personnel

No.	Position	Name
1	Captain	Mr. Tossaporn Sukhapindha
2	Chief engineer	Mr. Veerachai Chettasumon
3	Third officer	Mr. Somphote Vudthipanyo
4	Second engineer	Mr. Komson Sangphuek
5	Boatswain	Mr. Vudthirat Vudthipanyo
6	Steersman	Mr. Pradit Kui-prasert
7	Steersman	Mr. Tana Rungjoy
8	Oiler	Mr. Plew Shodok
9	Cook	Mr. Saichol Kornnoom
10	Ship's boy	Mr. Phaithoon Sriratanaphon

SEAFDEC Researchers

No.	Position	Name
1	Chief/Scientist	Mr. Isara Chanrachkij
2	Oceanographer	Mr. Sukchai Anuparpboon
3	Assistant researcher	Mr. Nakaret Yasook
4	Assistant researcher	Mr. Narong Raungsivakul
5	Assistant researcher	Mr. Aussawin Buachuay
6	Assistant researcher	Ms. Sukanya Obsomwan

Department of Fisheries Thailand Researchers

No.	Position	Name
1	Chief/Scientist	Mrs. Pattira Lirdwitayaprasit
2	Scientist	Lt. Chirat Nuangsang
3	Scientist	Mr. Kanit Chuapun
4	Scientist	Mr. Reangchai Sujittsakul
5	Scientist	Ms. Chanthip Bunluedaj
6	Scientist	Lt. Phitak Chaidee
7	Scientist	Mr. Aekkarat Wangkeaw
8	Scientist	Mr. Somsak Songnak
9	Scientist	Mr. Viboon Mechareon
10	Scientist	Mr. Chalao Pairaw
11	Scientist	Mr. Surasuk Kranet
12	Scientist	Mr. Amnuay Pisanpant

3. Observation Summary

Research Area and Station

23 survey stations are covered with in EEZ of Central Gulf of Thailand, has been assigned for conduct the research survey. The research survey is composed by 4 main activities i.e. fish sampling by bottom trawl, Oceanographic survey, fish larvae and plankton sampling and hydroacoustic survey by Scientific Echo Sounder. Range of sea depth is 30 – 70 m, covered 200 nautical miles, the activities of bottom survey has been included 22 route tracks of hydro-acoustic survey. The position of survey station has shown by the figure below.

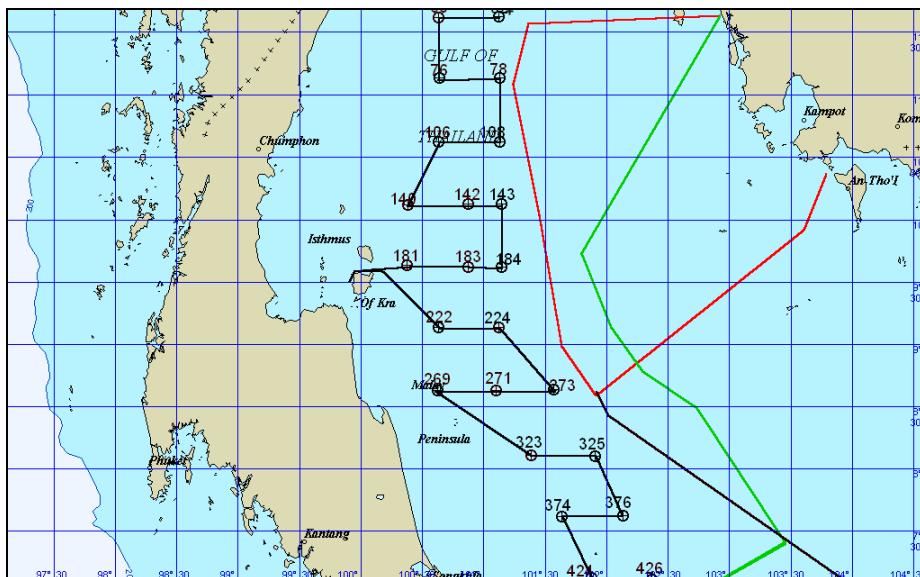

Fig. 1 Station surveyed by M.V. SEAFDEC 2 in the Gulf of Thailand

Table 1 Survey stations position of cruise no. 7-1/2005 in the Gulf of Thailand.

Station No.	Position	Station No.	Position
50	11-37.5 N, 100-37.5 E	222	09-07.5 N, 100-37.5 E

184	09-37.5 N, 101-22.5 E		

Research Activity

The Pelagic research Survey in Brunei Darussalam water (Zone 4) has been conducted by the collaboration between Department of fisheries, Brunei Darussalam and Training Department, by using M/V SEAFDEC2.

The survey had been conduct during 18 September to 5 October 2004. The survey was separated into 2 sessions. Survey stations No.1-17 were conducted in the 1st session, during 18-25 September 2004, the 2nd session were conduct at station no.16-22 and 27-32. Activities of the survey have been shown by the table 2 Summary survey station.

Table 2 Summary of survey stations

Station No.	Position	Hydro-acoustic	Bottom Trawl	Plankton and Larvae sampling	Oceanographic Survey

Oceanographic survey summary

Oceanographic survey in this cruise was operated 22 stations. Each station conducted with 2 main activities including physical and biological oceanography. Four types of oceanographic instrument were operated through the cruise that composing of iCTD, bongo net, PRR 2600, and TSG with Fluorometer. The position of oceanographic stations, used oceanographic instruments and field names in each station are shown in **table 2**. The partial detail of oceanographic activities is shown in **table 3**. Additionally, in every station physical parameters collected by iCTD are shown in **Appendix I**.

Remark: Oceanographic survey at station number 23 was cancel because of rough sea reason

iCTD (SBE 911) equipped with carousel: The iCTD was lowered from the ship through the water from surface up to 5-10 m above sea bottom approximately with constant velocity 0.5 m/s and retrieved to sea surface at the same speed. During retrieved instrument, it was stopped at standard depth; surface, 10, 20, 30, 40, 50 and 60 m to collect water sampling for nutrient analyzing at SEAFDEC laboratory.

Bongo net equipped with flow meter: Bongo net consisted of zoo plankton net and larvae net with mesh size are 330 µm and 500 µm, respectively. Net diameter was 60 cm. This instrument was used for long oblique tows. It was lowered and retrieved from surface to 10 m above sea bottom with 30 minuses of operation period. Flow rate of flow meter in front of zooplankton was 30.1945 r/m and larvae net was 29.500 r/m.

PRR2600: PRR2600 was only operated in day time from 08:00 to 16:00. It consisted of two sensor units. First unit was underwater radiometer that was slowly dropped in to seawater until 10 meter above sea bottom or 45 m if water depth was higher than 55 m. The other one was deck references radiometer that was placed for exposing sunlight at sterndeck area.

TSG with Fluorometer: TSG with fluorometer was operated during ship sailing from station to station. Its system was designed to continuously collect three parameters including temperature, salinity and fluorescence from underway vessel at approximately 5 meters below the sea surface. However, some station was canceled to avoid unexpectant damage. Owing to power pump in this ship was not enough for required rate.

Acoustic survey summary

This is the 3rd marine resource survey has been carried out in collaboration with the DOF/Thailand in order to obtain the preliminary data on the Bio-mass assessment in the Gulf of Thailand. The survey was conducted by using the Scientific Echo Sounder model FQ-80 equipped onboard M.V. SEAFDEC 2. All together 21 tracks (23 stations) were surveyed and data were recorded and preliminary analyzed onboard. The information of operations is shown in the table of FQ-80 Log Book (Appendix II).

Demersal fish sampling by bottom trawl summary

Trawl fishing operation by using SEAFDEC standard trawl net. 22 fishing operation had been done and one operation was cancelled because the time is not available. Total number of fishing operation was 22 operations and 20 operations has been succeed. Trawl operation at survey station No. 106 and 143 has been stopped because the net was struggled by rough bottom topography. Total catch was 185.018 kg, the partial details is shown in the **table 4**.
