Electronic System of ACDS (eACDS)

The eACDS is a software including web and mobile applications to link all supply chains in one unique system implementing by all stakeholders such as fishing master, fish buyers, fish processors, importer/exporters, etc.

The system provides access to the origin of fish by importer and/or customs of importing country including consumers via the QR Code that come with the Catch Certificate and fish/fishery products.

The mobile application is uploaded to Google Play Store for Android and App Store for iOS (in 2019) as free application for registered stakeholders.

eACDS
electronic ASEAN Catch Documentation Scheme

"eACDS is designed to meet the requirements of AMSs. The system supports in electronic documents, not creating unnecessary burden, cost or lengthy process for all supply chain, and importers/exporters."

Electronic ASEAN Catch Documentation Scheme

Step 1 Port-out Permission

Step 2 Catch Report at Sea

Step 3 Port-in, Catch Verification

Step 4 Catch Movement to Local Market

Step 5 Catch Movement to Processing Plants

Step 6, 8 Request e-CC to Catch Certification Unit

Step 7, 9 Export Fish Products to Importer

Step 10 Importer Validate the Catch Documents via e-system

Southeast Asian Fisheries Development Center

ASEAN Catch Documentation Scheme (ACDS)

SEAFDEC member countries expressed their support on the development of ACDS as a tool to prevent the entry of fish and fishery products from IUU fishing activities into the supply chain
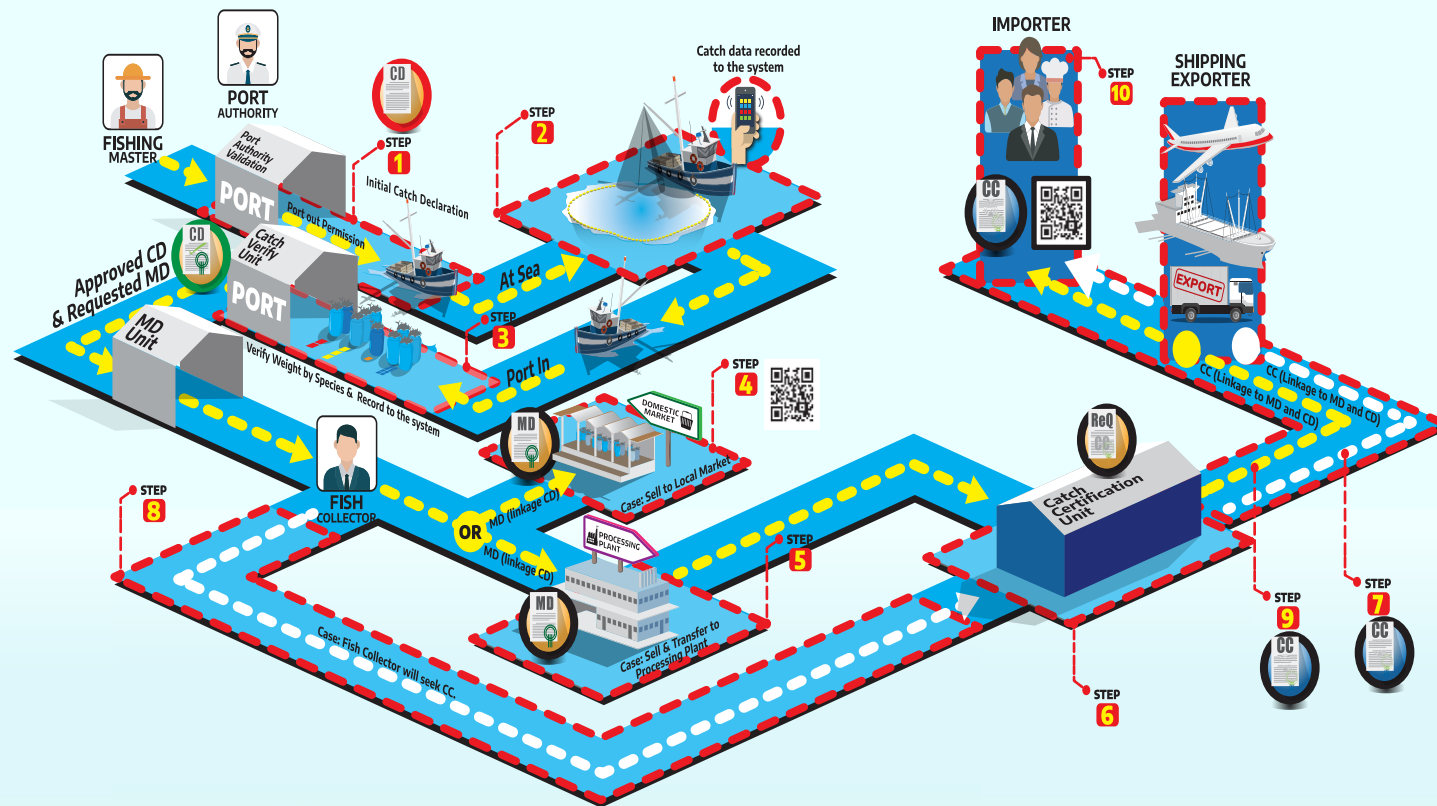

Development of eACDS : LESSONS LEARNT

eACDS integrated good practices and lessons learnt from:

➤ CCAMLR, CDS for Toothfish
➤ SwAM/Sweden, system for EU (testing)
➤ FAO Guidelines on CDSs
➤ FMO/THAILAND : MCPD

KEY DATA ELEMENTS (KDEs)

- Fishing Boat License
- Others
- Fishing Port
- Logistic Info.
- ACDS DATABASE
- Fish Species
- HS Product Code
- Fish Buyer
- Importer/Exporter
- Processor
- Boat Owner/ Fishing Master

FISHING MASTER

PORT AUTHORITY

Catch data recorded to the system

IMPORTER

SHIPPING EXPORTER

Port Authority Validation

STEP 1 — Initial Catch Declaration

STEP 2

STEP 10

EXPORT

Port out Permission

Approved CD & Requested MD

Catch Verify Unit

At Sea

STEP 3

MD Unit

Verify Weight by Species & Record to the system

Port In

STEP 4

DOMESTIC MARKET

CC (Linkage to MD and CD)

FISH COLLECTOR

OR MD (linkage CD)

Case: Sell to Local Market

PROCESSING PLANT

MD (linkage CD)

ReQ CC

Catch Certification Unit

STEP 8

STEP 5

STEP 9

STEP 7

MD

Case: Fish Collector will seek CC

Case: Sell & Transfer to Processing Plant

STEP 6

---

1) Catch Declaration (CD)
➤ Port-out control, issue initial CD and password
➤ Catch report at point of catch via mobile
➤ Port-in control, catch weight verification
➤ Issue the CD to fishing master

2) Movement Document (MD)
➤ Fish purchasing process at the landing site
➤ Issue the MD either to local market or processor

3) Catch Certification (CC)
➤ Processor request for the CC via web-based application
➤ The Competent Authority issues the CC for exportation
➤ The importer makes clearance on the CC

4) Processing Statement (PS)
➤ Statement created by processing plant to confirm that the processed fishery products had been obtained from catches supplied or imported

5) Re-export Certificate (RC)
➤ Document intended for the convenience of any AMSs fish and fishery products which had been previously imported into the AMSs for re-exportation without processing
